POST PROTECTION

Putting safety as priority to your indoor or outdoor space...

We supply post protection to any size (and shape) to help keep you safe. As a reality, no two posts or columns are the same, so we design and manufacture all post protectors to your own specification. These are finished in a range of 15 colours with optional logo integration, for corporate sponsors or brand identity. All post protectors are made using a standard 50mm thick, closed cell foam, which is enclosed within a waterproof PVC cover. Each protector is easy to install and is held closed with a full-length Velcro seam. Our range is manufactured with longevity in mind, with their design specific to consider the UK climate, withstanding the outdoor elements.

- Square Post Protection
- Rectangular Post Protection
- Cylindrical Post Protection
- Bespoke Post Protection

- 15 Standard Colour Options
- Any Size & Shape Available
- Indoor & Outdoor Use
- Made in England

COLOUR OPTIONS

For an additional cost you can opt to change the colour and/or including branding.
